

## **Space Utilization Study Cherry Brook Primary School**

---

*Community Workshop #1 – 11/1/2007*

### **CONTAINERS Breakout Session Discussion Summary**

There were approximately 15-20 people attending this breakout session. Jim Barrett led the group discussion. The breakout session discussion focused on issues that might be seen as constraints to the Cherry Brook Primary School site. The discussion included issues dealing with town demographics, current construction climate, physical limitations of site (inclusive of wetlands, topography, and septic issues), as well as possible zoning limitations of the site.

The following specific discussion points were voiced by attendees of this discussion group and are noted below:

- **SEPTIC FIELD**  
Has the Cherry Brook Primary School site reached its limit based on the septic system?
- **PORTABLE vs. TRADITIONAL CLASSROOMS**
- **PROJECT FINANCING**  
What/how financed
- **SUSTAINABLE DEVELOPMENT**
- **DEMOGRAPHIC INFORMATION**  
Are up-to-date numbers being used?
- **FULL-DAY KINDERGARTEN**  
Is it coming?  
Should we make provisions for it in our planning?
- **REDISTRICTING**  
Community sees redistricting as a very negative option

As this study proceeds, information will be posted on the web at:
